

LIQUEFIED NATURAL GAS

INNOVATIONS FOR A SPECIALIZED MARKET

MCDERMOTT

**WE HAVE THE PEOPLE AND EXPERIENCE
TO PERFORM AN ENTIRE LNG PROJECT
FROM START TO FINISH**

UNPARALLELED EXPERIENCE

Since our first LNG project in 1958, McDermott remains at the forefront of LNG technology and innovation. From our state-of-the-art LNG liquefaction facilities to cutting-edge LNG storage and distribution terminals, we design and build LNG facilities throughout the entire value chain, utilizing 60 years of LNG experience.

We offer a comprehensive range of services from project concept to completion for the whole LNG value chain, including:

- Module Design, Fabrication, Assembly & Integration
- Onshore Liquefaction Facilities
- Floating Liquefaction Facilities
- Regasification Terminals
- Peak Shaving Facilities
- Storage Tanks

Within these focus areas, McDermott services can include upstream development, site selection, conceptual design, detail engineering, procurement, fabrication, construction, project management, commissioning, start-up, operator training and initial operations.

**MODULARIZATION
& FABRICATION
EXPERTS**

YEARS
of LNG Experience

CAPABILITIES

MODULE DESIGN, FABRICATION, ASSEMBLY & INSTALLATION

We identify the balance between modularization and on-site construction to reduce execution risk and promote cost and schedule certainty.

ONSHORE LIQUEFACTION FACILITIES

We have extensive experience with the key processes and equipment utilized in baseload natural gas liquefaction plants.

FLOATING LIQUEFACTION FACILITIES

We help our customers monetize stranded and small reserves of gas around the globe by ensuring reliability and cost certainty.

REGASIFICATION TERMINALS

We have been a leader in the design and construction of LNG facilities for more than half a century.

CAPABILITIES

PEAK SHAVING FACILITIES

We have designed and built peak shaving plants around the world with liquefaction capacities of 1–20 million standard cubic feet per day.

STORAGE TANKS

We have completed more than 220 LNG storage tanks around the world, including the first double-wall storage and full-containment tanks.

INTEGRATED APPROACH

We have the people and experience to perform an entire LNG project from start to finish. Our in-house operations include engineers, supply chain experts, fabrication facilities and specialized construction crews around the world. Moreover, our LNG subject matter experts work directly with our customers from the earliest phase of a project all the way through operations and consulting.

ONE MCDERMOTT WAY

McDermott employees have embraced one culture – in all areas of our business and across our global footprint – in the way we execute projects. We deliver certainty for the most complex projects through company-wide consistency in systems, processes and execution.

CORPORATE SOCIAL RESPONSIBILITY

McDermott is committed to respecting people, the environment and the communities where we operate.

VALUE-ADDED PROJECT MANAGEMENT

Providing a single point of responsibility for the duration of a project controls costs, shortens project schedules, minimizes customer risk and ensures the finished product meets our quality standards. This approach allows our customers to focus on their core business instead of managing multiple contractors.

TAKING THE LEAD WITH SAFETY

Our strong safety culture reflects the company's commitment to the wellbeing of our employees. Taking the Lead with QHSES is a company-wide initiative designed to incorporate and elevate safety as an integral value within our corporate culture. Our goal is to set a winning example in QHSES and we encourage our partners, subcontractors and clients to work with us in the pursuit of outstanding QHSES performance.

MORE THAN 60 YEARS

LNG EXCELLENCE AND EXPERIENCE

▲ LNG storage tanks for the first transoceanic LNG shipment, carried by Methane Pioneer

▲ First regasification import terminal in the United States in Everett, Massachusetts

▲ Dominion Peak Shaving Plant EPC

● Malaysia LNG Construction
■ Sunrise FLNG Study
■ Kudu FPSO-FLNG Feed

● Woodside LNG Train 4 Construction
● Nigeria LNG Train 4 Construction
■ ALP Small Scale FLNG Study

■ Niche FLNG FPSO Study
■ Arctic FLNG Study

▲ World's first modern LNG peak shaving plant in Racine, Wisconsin, USA

▲ World's first full-containment 9% nickel steel and concrete LNG tanks on Das Island, Abu Dhabi, UAE

■ Mobil FLNG Study
■ Shell FLNG Study

● Camisea Gas Project EPC

■ Far East FLNG Study
■ FLNG Topsides Study
■ Shell Small Scale FLNG Study

■ Niche FLNG FPSO 3 & 4 Study
■ Generic FLNG Study
