COMPREHENSIVE SOLUTIONS FOR THE ENERGY INDUSTRY
McDermott is a premier, fully integrated provider of engineering and construction solutions to the energy industry.

McDermott takes a technology-driven approach to design and build end-to-end infrastructure to transport and transform oil and gas into the products the world needs today. From concept to commissioning, our expertise and comprehensive solutions deliver certainty, innovation and added value to energy projects around the world.

Operating in more than 50 countries, McDermott’s locally-focused and globally-integrated resources include approximately 30,000 employees, a diversified fleet of specialty marine construction vessels and fabrication facilities around the world.

Continuous Collaboration

Design is driven by the objectives of our customers. By identifying key performance indicators early in the planning process and evaluating viable solutions, we strive to understand short and long-term goals for each project. This continuous collaboration allows us to design and deliver high value, fit-for-purpose solutions on time and on budget.

Founded in Eastland, Texas

Projects completed 7 across continents

Our Commitment
McDermott helps companies solve today’s problems while meeting sustainability goals and planning for the complex challenges of tomorrow. Innovation and sustainability are at the core of our designs, processes and projects.

COMPREHENSIVE SOLUTIONS
McDermott spans the entire value chain from concept to commissioning for upstream and downstream solutions. Our comprehensive solutions responsibly deliver certainty, innovation and added value to energy projects around the world.

THINKING DIFFERENTLY
McDermott embodies the innovative thinking, tools and techniques we apply across our global operations. Our digital-centric approach transforms how we work together and the tools we use to increase efficiency and productivity and deliver sustainable solutions for our customers.

We help customers navigate the digital transformation and achieve sustainability goals through a unique approach to planning, design and execution.

30,000 EMPLOYEES
“OUR REPUTATION WITH CUSTOMERS AND THE STRENGTH OF OUR RELATIONSHIPS ARE AMONG OUR MOST VALUED ASSETS”
—DAVID DICKSON, PRESIDENT AND CEO

McDermott provides a vertically integrated solution combined with a unique company culture that creates consistent systems, processes and execution across our global footprint. Working holistically, through efficient and effective execution, we deliver industry-leading performance.

ONE MCDERMOTT WAY

McDermott employees have embraced one culture – in all areas of our business and across our global footprint – in the way we execute projects. This creates companywide consistency in systems, processes and execution. We are all part of one organization, doing things the same way so we can share work across regions to better match our capacity and capabilities to customer demand.

This culture drives efficiency and facilitates growth by enabling us to make full use of our global capabilities. With McDermott, customers can count on uniform processes and systems that uphold our consistently high standards worldwide.
Our strategic agreement with Lummus Technology provides our customers with technology solutions throughout the entire plant life cycle. Lummus is a leading licensor of proprietary petrochemicals, refining, gasification and gas processing technologies, as well as a supplier of catalysts, proprietary equipment and related technical services.

We provide comprehensive engineering services from conceptual design through commissioning. Our digital-centric approach transforms how we work together and the tools we use to increase efficiency and productivity and deliver sustainable solutions for our customers.

Employees at our offices around the world efficiently locate, evaluate, purchase and arrange for the transport of materials and services to any project site. Our expertise spans the entire supply chain, from sourcing, purchasing and transportation logistics to inventory control, inspection and quality assurance.

Our local fabrication facilities adhere to the same international set of standards, regardless of geography or location. Equipped with the best machinery and skilled craftsmen, we provide fabrication services from start to finish and can fabricate individual components, provide large subassemblies, trial fit and match mark large assemblies.

Specializing in both field and modular construction, we construct our projects using consistent tools, systems and standards to safely deliver superior results even in the most challenging environments. Our projects can be found on all seven continents and include many construction industry first-of-a-kinds.

Performing onshore and offshore, subsea and above-surface installation, our ability to mobilize personnel and vessels safely, where needed, optimizes productivity and mitigates risks across operations and projects.
UPSTREAM OIL AND GAS
We offer a full range of services including delivery of fixed, floating and subsea production facilities, pipelines and storage systems from concept to commissioning.

- Oil and gas production systems
- Subsea production systems
- Onshore oil & gas field production
- Onshore & offshore pipelines
- Natural gas processing

LIQUEFIED NATURAL GAS
We have served the liquefied natural gas (LNG) industry for more than 60 years. We have designed and built nearly every type of LNG project, operating on a global basis. We’re one of the few contractors that can perform the entire scope of services required through all phases of the project life cycle.

- Liquefaction plants
- Regasification terminals
- Peak shaving facilities
- Storage tanks
- FLNG topsides

REFINING & PETROCHEMICALS
Some of the most recognizable brands in the industry rely on McDermott to design and build their downstream oil and gas processing facilities. We are one of the few contractors in the world that can perform the entire scope of services required through all phases of the project life cycle.

- Refinery process units
- Petrochemical facilities
- Hydrogen & synthesis gas plants
- Sulfur processing plants

SUSTAINABLE SOLUTIONS
McDermott is actively developing sustainable solutions that support the energy transition.

- Sustainable engineering to design and build lower carbon facilities
- Green and blue hydrogen, liquefaction and storage
- Carbon capture, storage and utilization
- Offshore wind

STORAGE SOLUTIONS
McDermott’s storage business, CB&I Storage Solutions, is the world’s leading designer and builder of storage facilities, tanks and terminals. CB&I Storage Solutions has the global expertise and strategically-located operations to provide our customers world-class storage solutions for even the most complex energy infrastructure projects.

- CB&I Atmospheric Storage Tanks and Terminals
- CB&I Elevated Water Storage Tanks
- CB&I Low Temperature & Cryogenic Storage Systems and Terminals
- CB&I Nuclear Containments and Special Structures
- CB&I Pressure Vessels
- CB&I Thermal Energy Storage Tanks
- CB&I Water and Wastewater Egg Shaped Digesters, Clarifiers, Reservoirs and Standpipes

POWER
We provide a range of power generation solutions that accommodate various fuel types, output and operating characteristics.

- Simple and combined-cycle gas turbine power plants
- NET Power – A new natural gas power cycle that produces zero atmospheric emissions, including carbon dioxide
- Solid-fuel plants
- Reciprocating internal combustion engine plants
- Air quality control systems
