

# WORKING WITH MCDERMOTT

McDermott values our relationships with suppliers and subcontractors that play an important role in the success of our projects.

We partner with a diverse group of suppliers who share our core values of safety, ethics and teamwork.

# GETTING STARTED

If you are interested in working with us, please contact our supplier support team at [suppliersupport@mcdermott.com](mailto:suppliersupport@mcdermott.com) with the following information:

- What products do you manufacture and/or what services do you provide?
- What differentiates you from your competitors?
- What about your company will help McDermott win work?
- What certifications do you have that demonstrate your quality standards (i.e. ISO certifications, etc.)?
- How do you track and ensure safe work practices?

These questions represent a sample of our detailed supplier and subcontractor qualification process. Safety, quality, financial stability and many other factors are closely scrutinized before a supplier or subcontractor is deemed qualified to engage for business.

Our needs for raw materials and services flex with the lifecycle of projects. If your product is on our high needs category list, a supply chain representative will be in contact for further qualification. If not, your contact information will remain on file for 6 months in case a need arises.

We appreciate your interest in becoming a McDermott supplier.
